Professional Summary

Full Stack Developer specializing in ASP.NET Core and Angular, with 5+ enterprise solutions shipped across healthcare and e-commerce platforms serving 2,000+ active users. Career pivot from dental medicine to software engineering, focused on high-performance systems with measurable business impact. Seeking a role to contribute reliable, scalable backend solutions within a collaborative team.

Professional Experience

Full Stack Developer at [Maxilla Dental Store](#) | [Live Demo](#) | Full-Time

01/2026 - Present

- Designed and launched a dental e-commerce platform using ASP.NET Core & Angular 18, serving 2,000+ monthly active users.
- Accelerated page load speeds by 50% via Angular 18+ lazy loading, Standalone Components, and streamlined REST API design.
- Integrated 4+ secure payment gateway methods and built a full product management system tracking 500+ SKUs with real-time inventory updates.
- Implemented Clean Architecture on ASP.NET Core backend with RBAC across 3 user roles and JWT authentication, achieving zero unauthorized access incidents.

Backend AI Engineering Intern · [FlyRank](#) | [Certificate](#)

07/2026 - Present

- Embedded AI-driven workflows into 3+ ASP.NET Core microservice modules on the Backend AI Engineering Track, leveraging LLM APIs and vector search to power intelligent backend features.
- Applied prompt engineering through the General AI Fluency program, reducing repetitive backend development effort by approximately 30% across delivery cycles.

Full Stack Development Intern · [Information Technology Institute \(ITI\)](#) | [Certificate](#)

07/2025 - 12/2025

- Improved enterprise web app performance by 20% through SQL query tuning and Repository Pattern in ASP.NET Core.
- Enhanced Entity Framework Core (EF Core) queries and DB schemas, cutting load times by 50% for datasets of 10,000+ records.
- Delivered 3 multi-module projects in a 5-person team applying Clean Architecture, xUnit test coverage, and Agile/Scrum, meeting all sprint deadlines.

Projects

SafiStore · E-Commerce Platform (.NET | Angular) | [Live Demo](#)

- Developed a full e-commerce solution with ASP.NET Core & Angular 17+ using Standalone Components and Signals for reactive state management, featuring product catalog, cart, and secure checkout.
- Configured payment gateway, RBAC, JWT auth, and CI/CD pipeline via GitHub Actions; containerized with Docker, cutting deployment time by 40% across 3 environments with automated SQL Server migrations.

Simple ERP System · Enterprise Resource Planning Dashboard (.NET | Angular) | [Live Demo](#)

- Constructed a multi-module ERP automating 60% of manual inventory workflows with real-time dashboards, using Angular Standalone Components and Signals for fine-grained reactivity.
- Secured 1,000+ monthly transactions via RBAC & JWT; structured relational schemas in SQL Server to ensure 100% data integrity.

Ticket Reseat · AI-Assisted Event Ticketing System (.NET | Angular) | ITI Graduation Project (Team Contributor) | [Private Repo](#) - [Demo/Links available in email body](#)

- Led the AI-assisted seat allocation engine (ASP.NET Core & Angular), featuring an SVG seat map with real-time WebSocket-based locking across 500+ seats per venue.
- Created predictive algorithms boosting venue capacity by 15% across 20+ venues; processed 5,000+ bookings with revenue optimization (+25%).

MediQueue · Health Information & Queue Management System (.NET | Angular) | [Server](#) | [Client](#)

- Architected and released a multi-tenant healthcare SaaS platform supporting 3+ clinic workflows · queue management, appointment scheduling, and medical record tracking.
- Crafted a RESTful ASP.NET Core backend with real-time SignalR notifications for 100+ concurrent users; enforced RBAC across 3 roles · doctors, staff, and patients.
- Leveraged healthcare domain expertise to model 5+ clinical entities · patient history, diagnoses, consultations, workflows, and referrals · validated for clinical accuracy.

Skills

Backend: C# | ASP.NET Core Web API & MVC | Entity Framework Core | MediatR | RESTful APIs | JWT | SignalR | Identity | LINQ
Frontend: Angular (v14-18+, Signals, Standalone Components) | TypeScript | JavaScript (ES6+) | RxJS | Tailwind CSS | Bootstrap | HTML5 | CSS3
Architecture: Clean Architecture | SOLID | CQRS | Repository Pattern | Unit of Work | N-tier | Design Patterns | OOP | Agile/Scrum
Database: Microsoft SQL Server | PostgreSQL | Database Design | Indexing & Query Optimization
Tools: Git & GitHub | Docker | Vercel | CI/CD (GitHub Actions) | Postman | xUnit | Visual Studio | VS Code

Certifications

- FlyRank · Backend AI Engineering [Certificate](#)
- OpenAI GPTs · Designing Personalized AI Assistants [Certificate](#)
- Database Fundamentals · Relational Design and Optimization [Certificate](#)
- Advanced OOP with C++ · Solidifying Software Engineering Fundamentals [Certificate](#)
- Full Stack .NET Foundation [Certificate](#)

Education

- Bachelor of Oral and Dental Medicine, Faculty of Dentistry, Minia University

09/2016 - 06/2021

Languages

- Arabic: Full Professional Proficiency
- English: Professional Working Proficiency
